

Inliten® Exhibit System

Merchandising With Style and Ease

exhibiting solutions

Put the Spotlight On Your Products: Inliten® System

The Ultimate In Merchandising

Inliten was engineered to effectively support both your products and display your message. Its sleek, streamlined design puts the focus on your brand and products.

Graphics Command Attention

Look your best with Skyline Genuine Graphics! Massive fabric graphics are colorful and durable. Sheer fabrics allow for branding without blocking site lines, inviting prospects to explore your exhibit.

Packs Small to Save Money

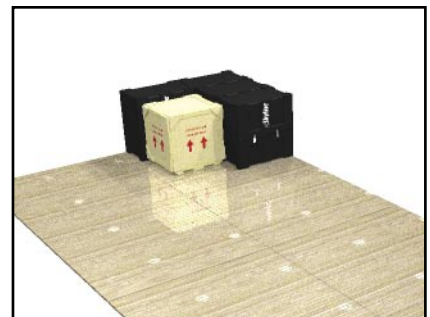

Get impact with lower operating costs. Skyline products pack down efficiently to maximize your event ROI.

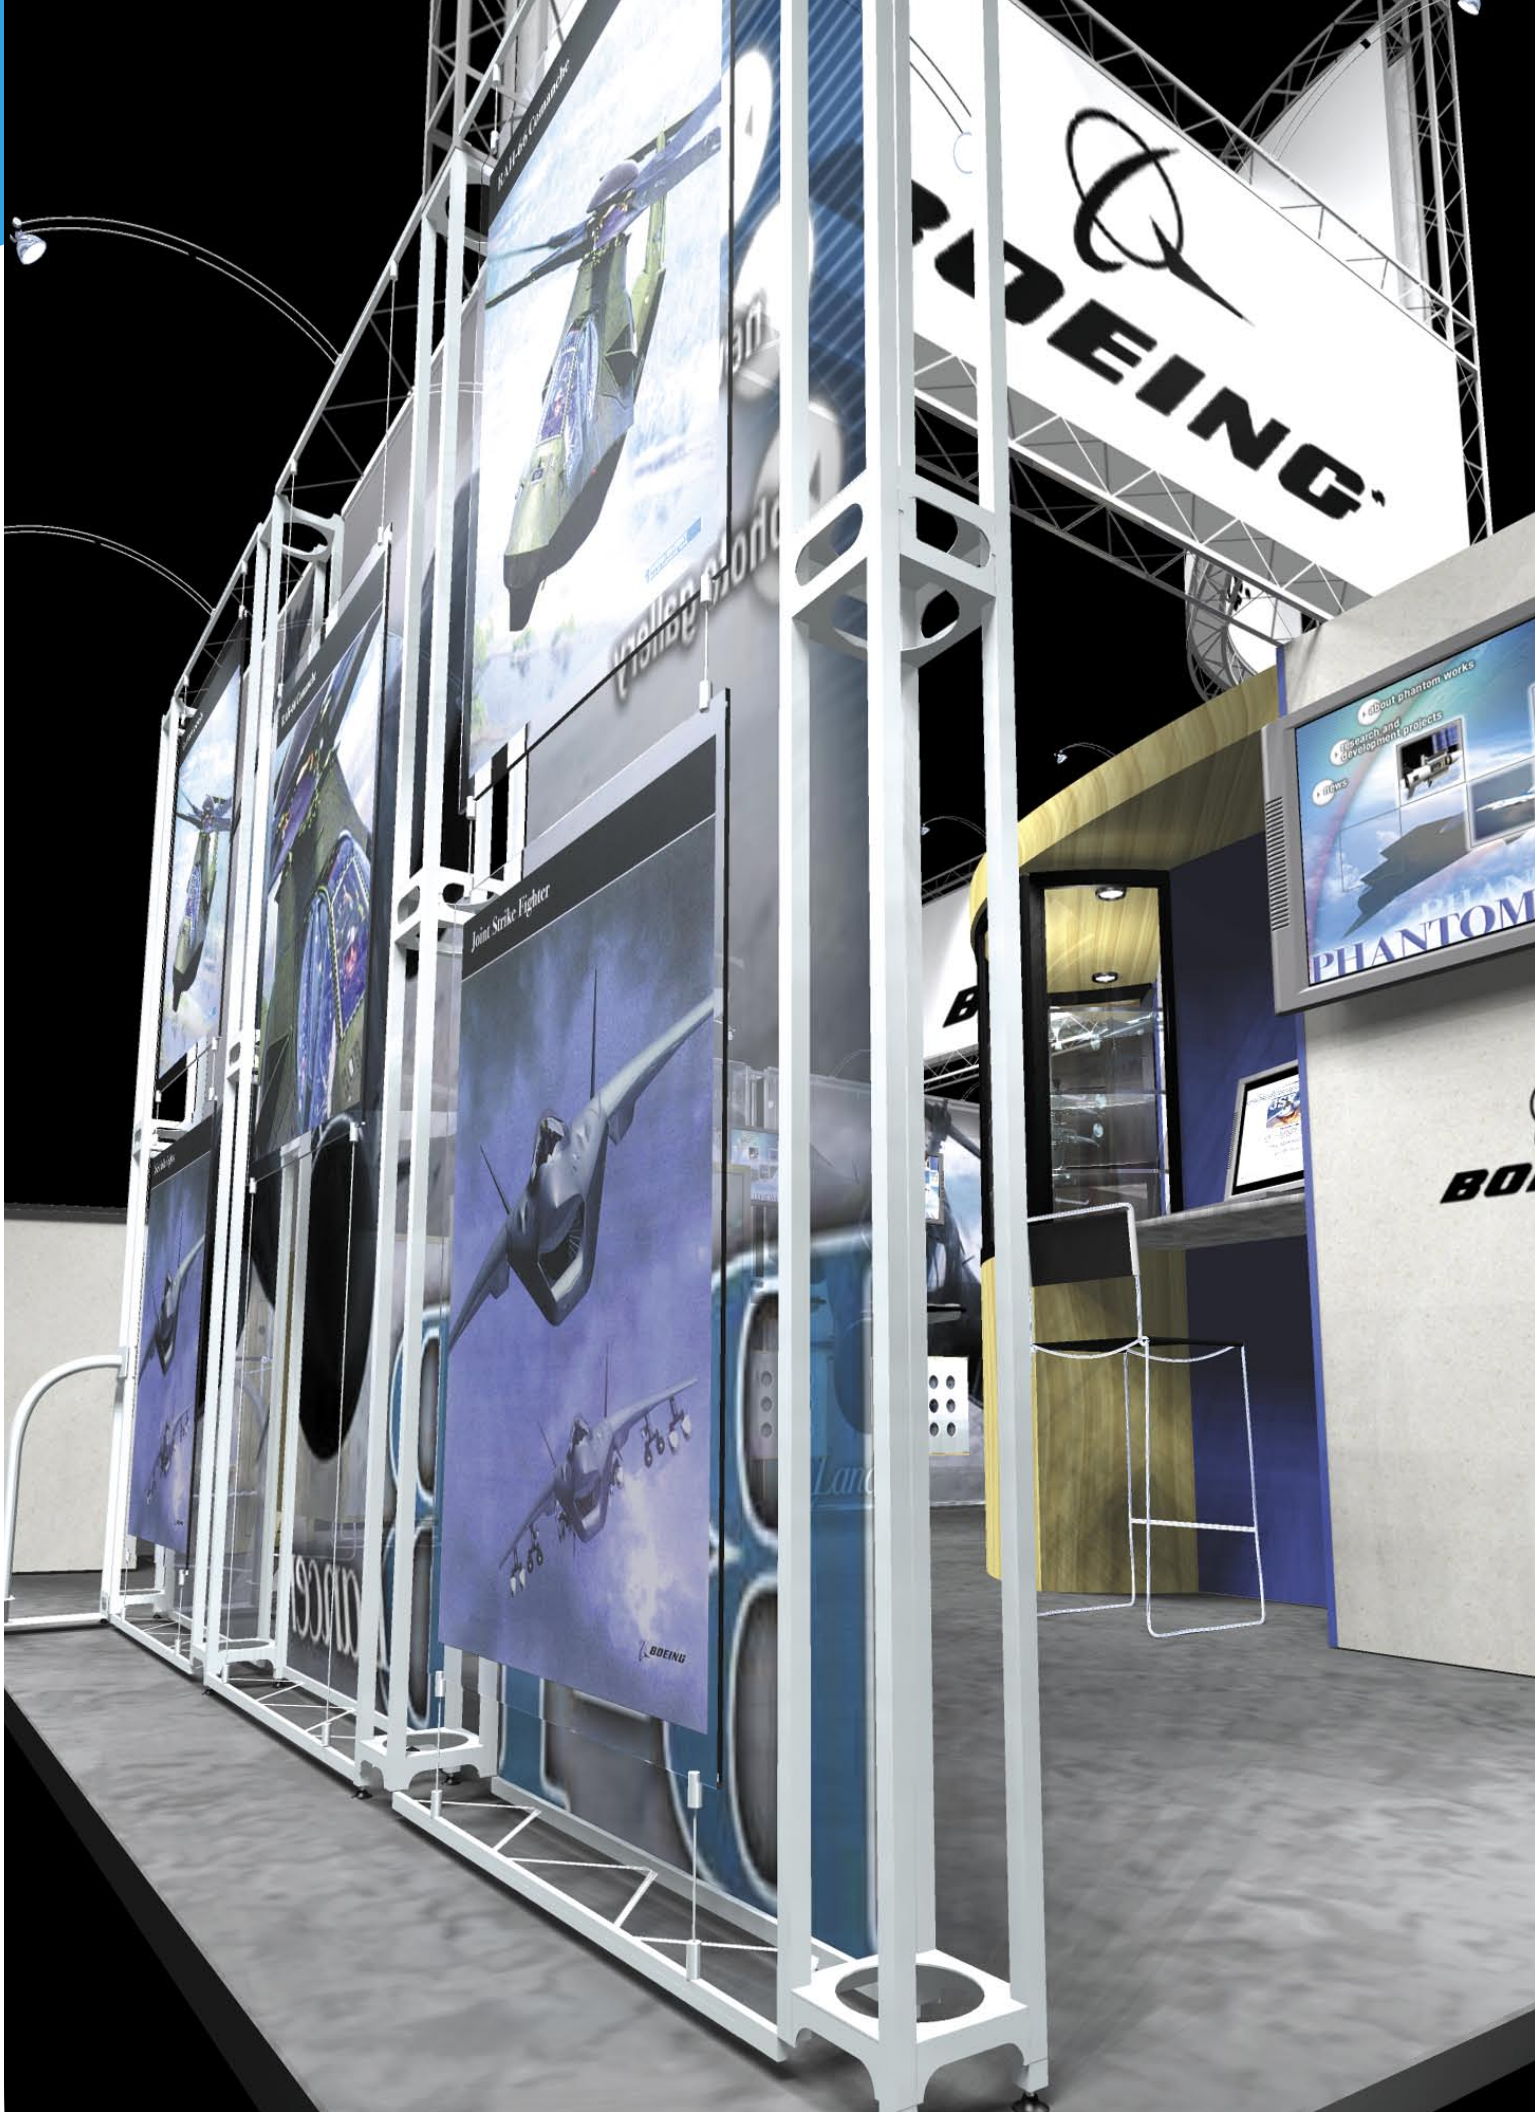

Inliten works seamlessly with other Skyline systems to provide a more robust exhibit solution.

Modular exhibits efficiently reconfigure to fit smaller booth spaces, giving you flexibility.

Save on shipping, drayage and storage. Excluding the double deck, the island exhibit above fits in just 5 containers.

BO

1 Streamlined Frame

Steel frame has a streamlined design and can accommodate fabrics or graphics on both sides.

2 Cable-Mounted Display

Add interest and depth. Cable-mounted graphics stand out with unique layered look.

3 Fabric Graphics

Fabric graphics are inviting and add mass without adding bulk or weight.

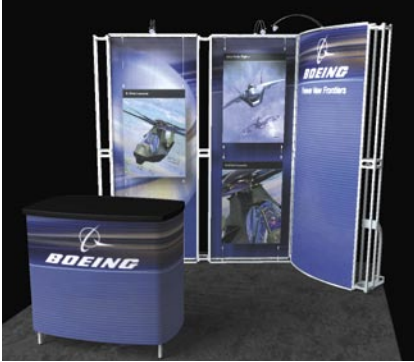

4 Merchandising Accessories
Waterfall brackets, peg bars, shelving and more display product of nearly any kind and weight.

5 Double Deck Compatible
Double decks provide space, dramatic effect and a place for private meetings or conferences.

6 Interactive Workstations
Engage and inform. Kiosks feature flat screen support and integral wire management.

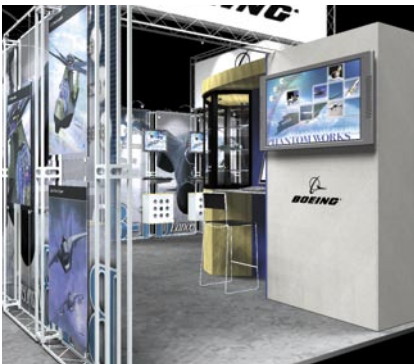

Inliten® System

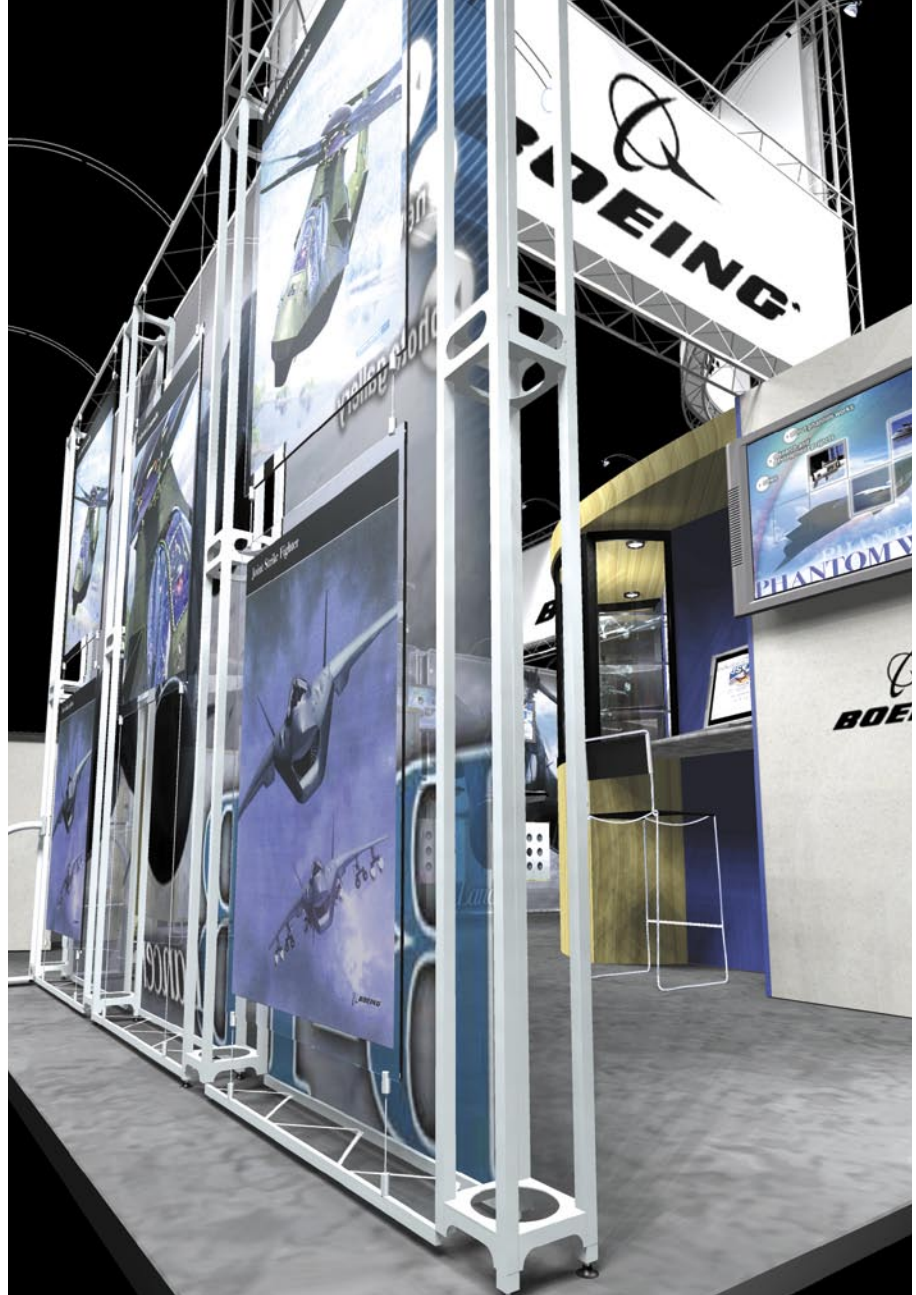

Portions of your larger exhibit can be used for smaller regional shows.

Flat screen mounts, keyboard shelves and storage units create effective kiosks.

Inliten integrates with ps3000 panel system to create conference or storage rooms.

Inliten works as part of a complete exhibit solution. It can carry graphics on both sides of its frame section which eliminates redundant structure and reduces costs.
