More Possibilities, For Less: UV Digital Graphics

Skyline's UV Graphic System allows you to get creative with dimensional graphics. Digital-direct printing on a variety of materials and computer-controlled profiling lets you create nearly any graphic imaginable.

Technology Brings Affordability

UV graphics are printed directly on select materials and can be profile-cut in sequence, streamlining the process and reducing costs.

Quality Skyline Graphics

Like all Skyline graphics, the UV Graphic System is color synchronized, so your colors remain consistent throughout varying materials and alternate processes giving your exhibit a cohesive look.

1 Skyline's UV Graphic System can print and profile materials up to 4-feet by 8-feet.

2 Profile-cut headers and stand-off graphics add interest and depth to your exhibit.

3 Graphics can be profiled in virtually any shape - from simple to complex.

Digital-Direct Print

UV prints directly to a variety of materials and cures the color instantly for high-quality, durable graphics.

Precise Profile-Cut Shapes

Computer-controlled cutting provides precision profiling for simple or complex shapes.

Media Up to 2" Thick

Prints and profiles graphics on materials up to 2-inches thick.

Color Fast, Fade Resistant

UV prints are fade-resistant and are warranted against fading for 2 years!

Scratch-Resistant

Durable UV prints are scratch-resistant which eliminates the need to laminate.

Indoor or Outdoor Use

Color-fast UV graphics printed on select materials can be used in outdoor applications.

Profiled UV Graphics are compatible with all Skyline modular systems. They are easy to attach, change-out and reposition.

Skyline UV Graphic System

Custom headers and signs can be cable-mounted or attached directly to Skyline modular systems creating a dimensional, layered look.
